Education

Yale University, New Haven, CT
Postdoc
Department of Computer Science

Cornell University, Ithaca, NY
PhD Student, Sloan Fellow
Department of Mechanical Engineering, PhD Minor: Computer Science
January 2023

Cornell University, Ithaca, NY
M.S. in Mechanical Engineering, Minors: Computer Science and Human-Computer Interaction
December 2020

University of Southern California (USC), Los Angeles, CA
Visiting Researcher, Department of Computer Science
August 2019

The Pennsylvania State University- University Park, State College, PA
B.S. in Mechanical Engineering, Bunton-Waller Fellow
December 2015

Research Focus: I am a computational social scientist at the intersection of artificial intelligence, human-computer interaction (HCI), and human-robot interaction (HRI). I explore methods and algorithms for deploying intelligent machines within human teams. My expertise lies in developing A.I. algorithms that allow machines can combine social cues with performance metrics to enhance team output and group viability. Additionally, I have 5 years of experience with mixed methods research and applying UX tools and methodologies to understand human behavior. My colleagues would describe me as a leader with strong social skills who works hard to ensure everyone feels comfortable and included within a team. I am currently seeking full time research scientist and postdoc opportunities that allow me to continue developing AI systems across different social spaces and analyzing their impact within these communities.

Relevant Graduate Level Courses: Decision Theory; Introduction to Reinforcement Learning; Machine Learning; Artificial Intelligence; Computer Mediated Communication; Robots, Teamwork, and Emotion/Advertising; Human-Robot Interaction: Algorithms and Experiments; Formal

Methods for Robotics; Foundations of Robotics; Methods of Applied Math I; Professional Product Design Studio; Foundations of Solid Mechanics.

Skills

Programming: MATLAB, Python, Arduino Uno , R, Robot Operating System(ROS), Javascript,HTML, C,C#, C++. **Other:** Spanish (Fluent - speaking, reading, and writing), SolidWorks, Unity,Artificial Intelligence, Machine Learning, Reinforcement Learning, Multi-Armed Bandit Algorithms, Statistical Analysis(ANOVA, T-test, Tukey HSD), Hardware(Robot design and circuits),Linux Environment, Human-Computer/Robot Interaction

Work Experience

Toyota Research Institute (TRI) – Research Intern *June 2021 - August 2021*

Worked as part of the UX Robotics team (RUX-ID) where I developed my own research project on how robotic platforms can co-exist with humans in the home. I leveraged both quantitative and qualitative methods (interviews) to test my hypotheses. Results were presented to the internal Robotics Machine Learning team where they will work to apply my findings into their system. Results may be published in the future.

Clubes de Ciencias(Santa Cruz, Bolivia) – Co-Instructor *June 2016 - Present*

Developed a one week course for high achieving college and high school Bolivian students and taught the class in Spanish. The course entailed Artificial Intelligence, robotics, and human -robot interaction. Clubs de Ciencias is a program that looks to develop a scientific community within the country and inspire high school and college students to pursue a STEM related field.

Louis Stokes Alliance for Minority Participation (LSAMP): Graduate Coordinator *June - August 2017*

Mentored undergraduate underrepresented students interested in pursuing a doctoral or graduate degree. Developed workshops to teach students how to write effective research papers. Had one-on-one meetings with students to guide them in creating their research posters and research presentation.

Johnson & Johnson Co-op: Ethicon, Inc., Facilities Engineer *January - May 2013*

Involved in various projects including drafting, renovation of various rooms and machines. Helped supervisor identify various problems with machines and innovate solutions to ensure that the factory ran smoothly.

W. Construction, Estimate and Contract Specialist *2004 - 2013*

Support parents with family interior remodeling company, by writing estimates electronically, managing e-mails, and translating.

Entrepreneurship

Vida- The Artificial Intelligent Companion, Founder

February 2020 – January 2021

National Science Foundation I-Corp Grant Recipient. Co-authored a grant and received a \$50,000 to explore commercialization opportunities for my research and to start a company. I led the company (6 members) to complete 100+ customer discovery interviews within the educational technology (edtech) space and worked with industry mentors and CEOs to develop a business model canvas for the company.

Teaching

- 1.) **Ubiquitous Computing(Teaching Assistant)**, Fall 2019- Designed and developed Machine Learning, Machine Perception, Signal Processing, Human Computer Interaction, as well as psychology and sociology laboratories and had students implement them in Jupyter Notebooks. Helped students with independent project developing new persuasive technologies.
- 2.) **Mechatronics (Teaching Assistant)**, Fall 2018- Helped teach an upper level engineering course at Cornell. I helped organize and develop lab experiments where students learned about analog electronics(filter design, circuits, transistors, etc.) as well as microprocessors and programming with C. I also helped students design, build, and program a microprocessor-controlled robot for a block placing competition using the C programming language.
- 3.) **Instructor of Social Robots Course**, 2018- 2019- Developed course to teach high school students about the field of Human Robot Interaction. Presented course at Bolivian Embassy in Washington D.C. and Santa Cruz, Bolivia as part of Clubes de Ciencias Program.

Research Conferences/Presentations/Press

- 1.) Claire, Houston B. (2021). Seminar Presentation. "Fairness Considerations for Enhanced Team Collaboration." Rochester Institute of Technology (RIT). (Virtual). September 2021.
- 2.) Claire, Houston B. (2021). Brown Bag Lunch Presentation. "Fairness Considerations for Enhanced Team Collaboration." Toyota Research Institute (TRI). (Virtual). June 2021.
- 3.) Claire, Houston B. (2021). HRI Pioneers Presentation. "Fairness Considerations for Enhanced Team Collaboration." 2021 ACM/IEEE International Conference on Human-Robot Interaction (Virtual Conference). March 2021.
- 4.) Claire, Houston B. (2019). Workshop Presentation. "Reinforcement Learning with Fairness Constraints for Resource Distribution in Human-Robot Teams". Sibley Graduate Student Symposium. Ithaca, New York. September 2019.
- 5.) Claire, Houston B. (2018). Workshop Presentation. "Understanding Social Dynamics in Robot - Human Handovers Through the Lens of Expectancy Violations Theory". Workshop paper, Human Robot Interaction(HRI) Conference '18 .Workshop on Longitudinal Human-Robot Teaming. Chicago, Illinois. March 2018.
- 6.) Conference Attendee(By Invitation). Institute on Teaching and Mentoring. Tampa, Florida. October 27 - 30,2016.
- 7.) Claire, Houston B. (2014). Technical Presentation. "Evolution Inspired Optimization of Soap Film Robustness". McNair Summer Research Symposium. Penn State University. July 27, 2015.
- 8.) Claire, Houston B. (2014). Technical Presentation. "Evolution Inspired Optimization of Soap Film Robustness". National McNair Conference. University of Maryland - Baltimore County. September 12, 2015.

- 9.) Claire, Houston B. (2014). Poster Presentaion. "Variable Stiffness". Society of Hispanic of Professional Engineers(SHPE)- National Conference. Detroit, Michigan. November 7,2014.
- 10.) Claire, Houston B. (2014). Poster Presentation and Technical Presentation. "Variable Stiffness Actuators". Undergraduate Summer Research Symposium. Cornell University. August 7, 2014.
- 11.) Claire, Houston B. (2014). Poster Presentation and Technical Presentation. "Variable Stiffness Actuators". Undergraduate Summer Research Symposium. Cornell University. August 7, 2014.
- 12.) Claire, Houston B. (2013). Poster Presentation and Technic al Presentation "Nanoscale Motor Using a Multiferroic System". Undergraduate Summer Research Symposium. Cornell University. August 8, 2013.
- 13.) Claire, Houston B. (2013). Poster Presentation. "Nanoscale Motor Using a Multiferroic System". Pennsylvania TRIO Conference. The Pennsylvania State University, University Park. October 17, 2013.

Honors and Awards

Future Faculty Program- Rochester Institute of Technology (RIT) *September 2021*
Selected to participate in RIT's future faculty program. I was invited to presented my research in a seminar and interviewed with various faculty and deans from the schools of mechanical engineering and computing and information sciences.

Edward Bouchet Graduate Honor Society *February 2021*
One of five Ph.D. students selected across the graduate school at Cornell to be inducted into the 2021 cohort of scholars at Yale University.

Commercialization Fellowship *March-December 2021*
One of seven Ph.D. students selected from the school of engineering to explore market potential for a research project that has been published.

Cornell Digital Agriculture Hackathon- Winner (Novelty Prize) *February 2020*
Was part of a team that looked to develop a process to create an eco-friendly and healthy probiotic drink from the waste product of a plant. I worked to apply machine learning algorithms to facilitate the process of gathering the waste product. Our team was one of the five winning teams selected for the \$1,500 prize from 150 participants from institutions around the world.

National Science Foundation Graduate Fellowship(NSGRF) - Honorable Mention *2018*

Sloan Fellowship *August 2016- Current*
Three-year fellowship support to pursue a Ph.D. in a STEM discipline. Funded by the Alfred P. Sloan Foundation and the Cornell Graduate School.

Diversity Programs in Engineering(DPE) Cornell- Graduate Student of The Month *October 2018*

Engineering Capstone Design Showcase– 2nd Place

August - December 2015

Project was awarded 2nd place overall among 77 engineering senior capstone groups. The project successfully integrated an Oculus Rift to a robotic headform. Due to sensors placed on the Oculus Rift, the headform was able to synchronously mimic the user's head movement

Bunton-Waller Fellowship

May 2011 - 2015

Prestigious full-tuition scholarship to Pennsylvania State University-University Park. Students are considered upon applying to the university and tuition is funded for 8 semesters.

Society of Hispanic Professional Engineers(SHPE) National Conference Poster Finalist November 2014

Selected finalist amongst undergraduate students throughout universities across the United States. Presented poster at the SHPE National Conference in Detroit, Michigan.

Research Experience

Robots in Groups Lab

October 2016 - Present

I currently aim to develop intelligent systems that can successfully be adapted into multi human teams. To do this I am developing methods where a system can learn about each individual team member's abilities through various means(e.g. camera, voice patterns, performance etc.) and influence the team dynamic through its behavior. I currently focus on two aspects: 1.) Developing frameworks and algorithms(e.g. Collaborative Tetris for research in fairness) 2.) human factors research to understand the impacts of fairness on the impact of the system on the developing team dynamics.

ICAROS Lab (Visiting Researcher)

January - August 2019

Developed a constrained multi armed bandit algorithm with regret bounds proofs to investigate the impact of perceived fairness in resource distribution within multi human-robot teams. Algorithm was experimented on a human team using a cooperative Tetris game that we developed. We also applied the algorithm on a vehicular robot and experimented applying the robot on human teams. Project included the development and testing of the algorithm, developing and leading the creation of a cooperative Tetris game using JavaScript and programming the control for the vehicular robot and vision system using Python and ArUco markers. This work was completed as a collaboration with the ICAROS lab at the University of Southern California(USC).

3d Summer School on Cognitive Robotics

July 17 - 21, 2019

Selected to attend the Summer School on Cognitive Robotics at the University of Southern California(USC) where I participated in various tutorials and workshops by leading robotics researchers in the field of cognitive robotics.

Collaboration with Organic Robotics Lab

October 2017- February 2018

Developed and ran a user study that investigated the impact of a novel haptic sleeve on users developed for virtual reality controllers. Helped develop motion profiles for the new controller using C++ and Python and analyzed data using R software. This work was a collaboration with the Organic Robotics Laboratory and Nvidia.

Wong Laboratory for Nature Inspired Engineering

January 2014 - December 2015

The goal of my project was to characterize the water droplets on Slippery Rough Surfaces(SRS). SRS are nature inspired surfaces which are created by altering the surface of a substrate at the nano level and adding a lubricant layer. Work included measuring the contact angle and understanding whether the droplet will observe to be in the Wentzel or Cassie State. Data was collected through a goniometer. Work and data collected will be used to submit a paper in the future resulting in co authorship.

Penn State University, McNair Summer Research Program

June - August 2015

The goal was to successfully demonstrate that genetic algorithm known as Differential Evolution could be used for material design. Work included: 1) fabricate an autonomous set up that would accurately allow the testing of soap film robustness, 2.) conduct research on and compile a list of chemicals that will be used to fabricate soap films, 3.) conduct robustness experiments and gather data until convergence is observed.

Ronald E. McNair Program- Scholar

August 2013 - December 2015

Competitive and selective program that offers guidance and assistance to a selected group of students that have shown interest in pursuing graduate school.

Cornell University, Organic Robotic Lab

Summer 2014

Conducted an independent project with assistance of graduate mentor on a silicone pneumatic actuator with variable stiffness. Successfully fabricated an actuator that was able to be electrically controlled. Gave a presentation and presented a poster at the Cornell Diversity Undergraduate Symposium. Funded by the Louis Stokes Alliance for Minority Participation (LSAMP).

Cornell University, Translational Applications of Nanoscale Multiferroic Systems (TANMS) Summer 2013

Conducted research about nanoscale motors using a multiferroic system. Simulated various situations and phenomena that the nano motor would be exposed to and learned a deposition technique using the Pulsed Laser Deposition(PLD).

Leadership Experience

Graduate and Professional Student Assembly(GPSA)-Field Representative

November 2016 - Present

Currently one of the two representatives for the department of Mechanical Engineering. GPSA gathers representatives from among the 7,000 students to address non-academic issues and collaborate with university administration to help bring positive change to the university.

"Engineering Workshop"- Founder

May 2016

Organized a workshop that taught middle school and high school students what the various concentrations within engineering. Recruited engineers with different backgrounds and they ran

a different activity that introduced them to the type of work that they do. This was done at Arlington Central Library.

Society of Hispanic Professional Engineers-Secretary

August 2014 - May 2015

Oversee various events as well as send out weekly newsletters to general body members. I was in charge of communications between executive board as well as supervising the Public Relations and Webmaster.

Engineering Orientation Network(EON)- Mentor

2014 - 2015

Provided guidance and assisted incoming freshman students interested in pursuing an engineering degree. Would meet with mentees and answer questions and address any concern if they arise throughout the year.

Founder of Penn State Champions League Soccer Tournament for Disabled Veterans

October 2013

Organized a soccer tournament where all funds went towards disabled veterans. Formed and led a committee that successfully raised \$510 throughout the tournament.

Volunteer Work

Los Angeles Mission

2019

Helped distribute food to members of Skid Row in Los Angeles, California.

Loaves & Fishes of Tompkins County

2016 - Present

Helped clean up and distribute food to members of Tompkins County.

Catholic Faith Center- Front Desk Volunteer

2015

Volunteered at front desk of the Catholic Faith Center at Penn State. Assisted by answering any questions students may have.
